Welcome

We are glad that you have chosen to partner with Canadian Spa Company on your path to wellness, relaxation and family fun time.

We started in the pool and spa industry 45 years ago with a vision to make the benefits of hydrotherapy available to everyone. Over the last few decades, our team has worked diligently to perfect hot tub designs that include all of the features that we know our customers love in a readily available and affordable package.

We keep quality at the top of our mind every step of the way, from the components that we use within our spas, to the hydro efficiency of our insulation and heat reclamation system, to the customer care and after sales service that we provide. This is part of the reason why our products have received numerous awards and accolades throughout the industry.

(3)

ACRYLIC SPA FEATURES

HYDROTHERAPY JET CUSTOMISATION Directional • Rotational • Adjustable • Interchangeable

There are two different styles of jets in our spas: directional, rotational.

Each jet provides a different hydrotherapy experience.

Directional

Rotational

Adjustable

All jets are individually controlled and adjustable. This includes the ability to increase/decrease the flow of each jet by rotating the faceplate which allows for complete control over the massage.

Our unique design makes it easy to turn the jet face.

Interchangeable

Each jet can be interchanged with any other jet of the same size.

This means ultimate individual customisation for every seat in the spa.

Our diverter valve lets you concentrate the full power of our pump(s) to one or both sides of the spa giving you full control of the flow volume.

Every jet is equipped with air control valves which control the amount of air mixed into the water to further adjust the hydrotherapy massage pressure level and increase blood circulation.

COMPONENTS FROM LEADING MANUFACTURERS

Our industry leading 15A 5HP 2 speed pump provides more power than any other pump on the market to circulate the spa water and provide a deep hydrotherapy massage.

Sensors detect water flow and pressure to circuit

Built in energy efficient heater provides hot water and is controlled by our digital control pack. Energy saving features include a daily purge system to keep hot tub pristine.

EFFICIENT HOT TUB PLUMBING

Our oversized 2.5" intake is **25%** more efficient than the industry standard of 2" for maximum flow.

No right angle restrictions in our plumbing means better flow-through and less resistance placed on the pump.

There are no twisted or rigid corners with our FlowFlex coil pipes, allowing for maximum water pressure.

For user safety, our spas are fitted with a vacuum brake, ensuring the suction inside the spa is cut off immediately if blocked.

3 Step water purification

CANADIAN SPA COMPANY OXIDATION PROCESS

Ozone Generator + UV-C Germicidal Light + Glacier Filtration = AO₃P

UV installed AO₃P system installed in every spa

Our Glacier AO₃P system sterilizes up to 99.9% of bacteria in your hot tub, reducing chemical usage by up to 80% and leaving your water crystal clear!

BACK GARDEN DELIVERY FORM

Upload your information to our site and our experienced team will provide you with a quote to move your spa from the kerb to your garden, remove the packaging and install the accessories.

Warm air rises and the majority of heat is lost through the top of the spa, this cover helps to retain the heat.

Introducing Black Out Insulation

Black Out insulation will also increase the absorption of heat in materials up to 20%. Our innovative insulation is an industry first.

Black Out Foam Curtain Insulation

ABS SEALED BASE

The waterproof base is designed with a layer of the same infrared reflective material found on the cabinet walls. This prevents heat loss and moisture damage.

FILTRATION SYSTEM

Our Digital filtration system guarantees clear water using 75% fewer chemicals

Pre-Filter - Fine mesh screen to prevent your filters becoming clogged.

Silver-Ion - Embedded into the filter, acts as a natural disinfectant and our antimicrobial filter pleats inhibit the growth of bacteria

Mazzei Injector - Produces smaller bubbles and creates the vacuum to pull the ozonated air into the water stream

Ozone Purifier - Generates ozone to aid in the oxidation of the spa water.

Mixing Chamber - Breaks down the ozone Bubbles and helps absorb the ozone into the water.

UV - Neutralises the unabsorbed ozone and neutralises bacteria in the water.

TORONTO UV

100 sq ft Glacier filter with prefilter

Toronto UV
6 person spa

KH-10168

CHROMOTHERAPY GUIDE

CANADIANSPACOMPANY.CA

RED	Increases respiration rate, enhances metabolism, raises blood pressure. Activates circulatory and nervous systems.
ORANGE	Energizes body, reduces localized fat and eases digestive system discomforts. Used to treat asthma and bronchitis.
YELLOW	Has a cleansing effect, purifies blood and increases neuromuscular tone. Stimulates happiness.
GREEN	Acts as a relaxant and fights depression. Regulates pituitary gland, calms nervous systems and insomnia.
STRONG GREEN	Regenerative stimulation, fights infections. Slows metabolism and produces calming effect.
BLUE	Calms breathing and heart rate. Lowers blood pressure, helps insomnia and headaches. Reduces overall gain.
STRONG BLUE	Reduces stress and nervous tension, lubricates joints, and fights infections.
INDIGO	Helps eye inflammation, cataracts, glaucoma and ocular fatigue.
PURPLE	Relaxes muscles, relieves headaches and arthritis pain. Purifies body and assists with detoxification.
PINK	Eliminates impurities in the blood stream. Cleanses body, and strengthens veins and arteries.
WHITE	Stimulates production of serotonin, regulating sleep and nervous system. Provides energy and helps reduce effects of seasonal affective disorder (SAD).

SWIM SPAS

Powerful swim lane jets
Current River jets deliver a powerful continuous stream of water to aid straight and level swim

SWIM SPA FEATURES

St. Lawrence 13ft swim spa
L390 x W228 x D137cm **KS-10004**

The 13 ft. St. Lawrence Sport Pool is perfect for swimming and aqua-aerobics alike. It has 3-river resistance jets, creating our unique swim lane system. The 3-water pumps and large flat floor make it ideal for a wide range of activities, like jogging against a gentle current and experiencing the benefits of resistance training.

The water flow is fully adjustable, allowing you to customise it for any level of activity. The 13 ft. St. Lawrence also functions as a hot tub, so after a good swim, relax with a soothing massage in one of the four multi-jet Captains' Chairs or a full body 12 massage jet stand up area. The built-in digital audio system with pop up speakers provides music entertainment, perimeter multi-coloured LED lighting and 2-cascading waterfalls enhance relaxation. The waterfalls also act as a visual aid to keep your pace, all in the privacy of your own home.

St. Lawrence 16ft swim spa
L500 x W228 x D137cm **KS-10005**

The St. Lawrence Swim Spa features a unique Swim Lane system that uses 3 resistance jets and 2 profile aligning jets to ensure that you receive the preferred pressure and support needed for swim exercise.

- 4 hydro-massage seats and 1 full length lounger. 72 massage jets
- Insulation includes high-density closed cell foam that surrounds the shell and an infrared-lined insulated cabinet that traps the heat inside the spa making it more efficient

Includes two-part hard top cover, Anti-microbial filter set, fibreglass tether pole for resistance swimming and aerobic exercise.

Ideal for learning how to swim

Perfect for exercise and practice

Galvanised steel frame
Sturdy integral galvanised steel frame

St. Lawrence 20ft fully featured dual temperature/zone swim spa and hot tub
L594 x W228 x D137cm. **KS-10006**

Enjoy the luxury of the 20 ft St Lawrence Swim Spa with dual zones for both a hot tub and a swim spa experience. Each side can be controlled independently to allow for different temperatures. The unique jet system in the swim spa provides controllable resistance for swimming and aqua-aerobics. After exercising, relax in the hot tub while adjustable hurricane jets target your back, calves and feet.

SPA FURNITURE

Chill Therapy Tub

KE-10001

212 x W102 x D81cm,
140 Kg Dry
640 Kg Filled

Temperature Control: Our Chill Therapy spa is equipped with advanced temperature control systems, allowing users to precisely adjust the water temperature. This is particularly useful in hot climates, as it provides a cooling and refreshing experience.

Energy Efficiency: Modern chill tubs are designed to be energy-efficient, minimizing electricity usage while maintaining optimal cooling performance. This is especially important in the Middle East, where energy consumption can be a significant concern.

Durable Construction: Built to withstand harsh weather conditions, chill tubs feature robust and durable materials suitable for both indoor and outdoor use. This ensures a long lifespan and resistance to wear and tear.

Ergonomic Design: The tubs are designed with user comfort in mind, featuring ergonomic shapes and seating that provide a relaxing experience.

Features

- * BUILT IN CHILLER
- * BUILT IN HEATER
- * BUILT IN OZONE
- * BUILT IN UV
- * BUILT IN LED
- * BUILT IN DRAIN

For centuries, people have been using ice baths for therapy, health benefits, and sports recovery. Help reduce pain and inflammation, fight muscle fatigue, and improve mood. Clean & Cold water — 24/7

HEAT PUMP AND A CHILLER (Optional) KK-11407

Features a typical energy efficiency (COP) of 5 to 10 times a traditional spa heater and may reach up to 15 times in certain operating conditions

(24)

COMPACT

Having a height, width, and depth of under 500cm, our heat pump is a fantastic option for people wanting a noninvasive compact heat pump. Can be installed as close as 30cm

KY-10025

HOW SAUNA HEATING WORKS HEATING THE BODY CORE

All sauna heating systems work in the same way to heat the core of the body.

STANDARD FEATURES

SOLID FRAME

Solid wall/stud wall, not particle or MDF board, stronger structure, less chance of warping.

CANADIAN SPA - MICA FAR INFRARED

MICA Heaters heat evenly and are more efficient than standard carbon fibre heaters and with low EMF levels and no off gassing. They are very effective at heating your body core and helping your body detox.

EVEN SURROUND HEATING

In your Canadian Spa Far Infrared Sauna only about 20% of the heat goes to heat the air and the other 80% directly heats your body. The result is deeper tissue penetration. Health benefits start at lower heat, starting 32°C. You can set your sauna at a more comfortable temperature.

DIGITAL CONTROLS

Easy to view and change temperature settings with our digital control panel.

TIMER SETTING

Adjust the amount of time you wish to spend in the sauna at your desired temperature.

PRE-HEAT SETTING

Schedule your sauna time everyday by setting up a pre-heat time so that it is always ready.

FREE-FLOW CORE
Ensures steady flow

QUALITY FILTERS
Rigid and long-lasting 100% polyester Reemay filter fibres

WITH ANTIMICROBIAL TECHNOLOGY
Inhibits the growth of bacteria, mould, and fungi that can cause contamination of the filter cartridge

SILVER+STREAM
Natural silver ions stop harmful bacteria from building up inside your filter and entering your spa water

FILTERS

Increase the cleaning power of your spa with an antimicrobial spa filter! Our filters are infused with antimicrobial protection to inhibit the growth of bacteria upon the cartridge and extend the filter's life. Silver ion technology is added into the end caps and fabric of this filter, making it the most advanced filter cartridge available. Break the cycle of bacteria growth when the spa is not in use and the high demand of chemicals once it starts up. Filter should be changed every 4-6 months for best results.

The Canadian Spa Glacier Filters: Antimicrobial filters with a silver ion slow release water purification system available in twinpack + pre-filter screens or single Glacier filter. These filters are compatible with the Canadian Spa Grate filter system.

REPLACEMENT
HOT TUB COVERS

We manufacture our covers for our spas and replacement covers with all the features included as standard. All our covers carry the ASTM (American Society for Testing and Materials) Standard to ensure peace of mind. We carry a large stock of the most popular sizes, so we can fulfil quickly.

Cover Comparison

Canadian Spa Cover:
25% better insulation
No heat loss through middle seam
Easy to lift cover from all sides
Skirt completely seals spa

Other Covers:
Thinner cover
Less heat efficient cover
No side handles
Shorter skirt does not seal spa

www.canadianspacompany.com

8 Locking Straps

Eight locking straps secure your cover against strong winds or unwanted access

canadianspacompany.com

Full Steam Seal

Compare our full length steam seal which insulates the entire fold of the cover and reduces heat loss

canadianspacompany.com

Metal Channel

Two parallel C-channels provide support along the entire length of the cover to protect against heavy snow loads or accidental damage

canadianspacompany.com

Drainage

Drainage grommets allow for trapped moisture to escape which keeps your cover lightweight

canadianspacompany.com

5" Skirt

A five inch skirt keeps heat inside with a snug seal that extends all the way around the spa

canadianspacompany.com

Vapour Barrier

Our 6 mil vapour barrier protects against water absorption better than the industry standard 3 mil barrier.

ROLLING COVERS

Roll covers have revolutionized spa maintenance, offering a convenient solution compared to the cumbersome heavy covers of the past. These older covers often discouraged users from frequently accessing their cherished spas due to their challenging removal process.

The Roll On Roll Off cover, constructed from carbon fiber, boasts a weight 25% lighter than its counterparts, ensuring effortless handling. It's specially crafted to be manageable by a single individual, who can unveil the spa in under a minute. Thoughtfully integrated eyelets in the cover release trapped air as it's rolled, preventing unwanted bulging.

Our commitment is to deliver top-notch products, and our Roll Covers exemplify this promise. They're fortified with sturdy supports that prevent them from collapsing, ensuring they remain in prime condition across various weather scenarios.

Constructed from robust materials that are UV-resistant, waterproof, and designed to weather the elements, each seam is reinforced with double stitching to guarantee optimal protection, even in the face of gusty winds. The Roll On/Roll Off cover features advanced triple thermal shield technology, encompassing three separate insulation layers and two air pockets. This design effectively traps heat, ensuring an impeccable seal. Remarkably, this cover reflects 97% of the spa's infra-red heat back into the water, making it the spa's most thermally efficient component. Consequently, this boosts energy efficiency, resulting in noticeable savings for spa owners.

COVERS LIFTERS

Bottom mount cover lifter **KA-10026**

- Mounts directly to spa
- Aluminium
- Fits up to 95" wide spas
- Requires 17" clearance
- Max spa depth 36"

POSITIONING OF YOUR SPA

Local Regulations:
There may be certain restrictions and/or requirements that are particular to your locality. If in doubt, check with your council.

Delivery Passageway:
The spa will arrive as a unit, and cannot be disassembled. Ideally the spa will be placed on a trolley, either on its side or on its base.

The unit will then be rolled into place easily crossing grass, gravel, and small terrain anomalies.

If your access does not meet these conditions, or in the case of other obstacles (steps, fences, walls, steep hills, etc.)contact Canadian Spa Company

THERE ARE 2 DIFFERENT METHODS OF DELIVERY TO CHOOSE FROM:
